Work Experience

Software Engineer with IDI Billing Solutions

April 2021 – Present

- Developed a custom app using Angular and dotnet core to manage orders within Apple utilizing their API.
- Created a new data import using an existing framework to import data from csv files.
- Developed custom scripts to communicate with external APIs, enabling and disabling phones/features.
- Mentored newer developers hired to the team.
- Investigated cases that have come through support and open tickets as needed.
- Helped to define processes and guidelines for the team.

Software Engineer with dunnhumby

September 2018 – April 2021

- Implemented first proof of concept of using Vue.js and unit tests in the application.
- Rewrote the application's Adobe InDesign plug-in to enhance security.
- Troubleshoot and fixed bugs, working with Quality Assurance and Customer Support to make sure the intended functionality is captured.
- Developed new features based on given requirements, working with the Product Manager to clarify and update requirements as needed.
- Worked as part of an agile team to ensure all deliverables are met.

Technical Consultant with dunnhumby (acquired Aptaris in May 2018)

June 2017 – September 2018

- Validated client data based on technical requirements and provided feedback to the client.
- Participated in meetings with clients to discuss data and data processes.
- Troubleshoot data related issues found in implementing the data in the application.
- Collaborated with other teams to keep the Technical Requirements Document up to date.

Business and Quality Analyst with Aptaris

April 2016 – June 2017

- Regression tested releases before the quarterly release and reported any issues to the development team.
- Developed automated testing using Nightwatch.js and Selenium webdriver.
- Wrote test plans for new features based on given requirements.
- Wrote requirements for new features based on given business needs.
- Investigated bug reports and created tickets for the development team.
- Tested new features and bug fixes, reporting any issues to the development team.
